

B A DIE MOLD *Since 1968*

Leader in the design and fabrication of injection molds

We understand medical device manufacturing.

- PM and engineering changes
- Part design and refinement
- Sampling/material testing
- Rapid prototyping
- High precision molds built for the critical components that you must produce daily
- Our patented PERC servo unscrewing system for clean rooms

If there's a way to build it better, we will find it!

Entrust the design and manufacture of your most valuable assets, your molds, to B A Die Mold - a trailblazer in the design and manufacture of close tolerance injection molds for complex parts.
