

PATENTED

# PERC SYSTEM

PERC™

**Revolutionize the Way  
You Mold Threaded Parts.**

**Fast, Accurate,  
Clean & Easy to Use.**

Since 1968, B A Die Mold has revolutionized molding threaded parts with solutions like their patented **PERC™ System** (Programmable Electric Rotating Core). The **PERC™ System** is a compact, high speed, high torque and high precision system utilizing programmable servo motors in place of hydraulics for unscrewing applications.

Find out why leading product designers and OEMs insist on using PERC over other systems, including:

- Accurate, fast and efficient core positioning with unlimited turns and programmable speed profiles
- Virtually maintenance free
- Scheduling not dictated by the availability of auxiliary hydraulic equipment
- PERC's compact size makes for fast, easy set-ups
- Eliminates messy hydraulic oils
- Complements the efficiencies of your electric molding machines allowing the use of smaller presses

**If there's a way to build it better, we will find it!**

Entrust the design and manufacture of your most valuable assets, your molds, to B A Die Mold.

**B A DIE MOLD**

*Since 1968*

*Leader in the design and fabrication of injection molds*
